

K150Li

EXTREMELY LIGHT BATTERY-POWERED CONCRETE SCREED

The K150Li is a further development of the combination of the well-known K150B and K150ER lightweight screeds. All the positives of these two machines are kept and experiences gained from the field have been implemented. The K150Li is 27 percent lighter in weight and works on the well-known 18V Lievers battery system. Due to this electric motor, you do not suffer from exhaust gases. This makes the machine perfect for use in small indoor spaces and contributes to the aim of building as emission-free as possible.

K150Li

Main features:

- Fully cordless concrete finishing due to 18V battery system
- Working width 1,5 meter
- Standard equipped with a speed controller
- Brushless 750W high efficiency motor
- Working on 5Ah battery with 30 to 50 minutes capacity each (depending on speed setting)
- Batteries interchangeable with other Lievers 18V machines
- Battery charging time in up to 75 minutes
- Standard delivered with 2 x 18V/5Ah batteries , 3 battery version optional possible

TYPE	DRIVE UNIT	VIBRATIONS	WEIGHT
K150Li	18V BLDC 750W	2500-7000 PER MIN	11 KG
