

LAP 45

LIGHTWEIGHT PNEUMATIC POWER TROWEL

Powerful, emission-free, and user-friendly power trowel highly suitable for use in the concrete industry.

Description

The LAP45 is a powerful, lightweight pneumatic power trowel for smoothing concrete surfaces. Thanks to its robust construction, quiet air motor, and ergonomic operation, this machine is perfect for intensive use in the precast concrete industry. Reliable, wear-resistant, and easy to use – ideal for professional results.

Features

Key features of the LAP45 power trowel:

- Equipped with a very strong and effective air motor with silencer.
- Comes with an easily replaceable \varnothing 450 mm wear-resistant disc (\varnothing 330 to 550 mm available on request).
- Ergonomic control handle with air valve and Orion quick coupling for connection to a compressor. The compressor must be equipped with a pressure regulator, water separator, and oil mist lubricator.
- Features a stainless-steel internal motor.

Technical Information

Working pressure:	Max. 6 bar	Rotational speed (under load):	0 - 275 per minuut
Air motor capacity:	0.380 kW	Air consumption:	520 l/min
Disc diameter:	450 mm* * (330/550 mm available on request)	Handle length:	1.4 m
Sound pressure:	70 decibel (dB)	Total weight:	9.9 kg (including disc)

Replacement discs with nylon screws are available separately.
